SPEND YOUR SUMMER EXPLORING STEM AND ENTREPRENEURSHIP!

The Young Innovators Program, launched by UChicago and MIT, empowers high achieving students for academic and career success in STEM innovation. In partnership with Invenergy, an industry leader in renewable and clean energy generation and the Polsky Foundation, students have access to experiential learning opportunities, mentorship from industry leaders, and a network of entrepreneurial peers.

All rising high school sophomores interested in entrepreneurship, engineering, sustainability and more are eligible to apply. Students from backgrounds that have historically been underrepresented in STEM are strongly encouraged to apply. Learn more and apply at Careeradvancement.uchicago.edu.

PARTNER ORGANIZATIONS:

Invenergy drives innovation in energy. Invenergy and its affiliated companies develop, own, and operate large-scale renewable and other clean energy generation and storage facilities in the Americas, Europe and Asia.

All Young Innovators will receive mentoring from Invenergy professionals through an immersive trip to the Chicago-based headquarters.

How Invenergy Supports Young Innovators

- Expert speaker series
- Startup pitch coaches
- Immersion visit at Invenergy’s Headquarters office in Chicago
