EXPLORE. LEARN. FLOURISH. HAVE FUN.

Join fellow engaged, idea-driven students from around the globe as you dig in—sometimes literally—to a Summer Session program at one of the world’s great intellectual destinations.

WHAT STUDENTS ARE SAYING

“Nothing can compare to the Summer Immersion Program at UChicago and I loved absolutely every single part of it. I will never forget the things I learned and friends I met. Thank you UChicago for such a life changing experience.”

This summer you can explore the world of economics, conduct meaningful research, improve your analysis of 52-million-year-old fossils, and enjoy the excitement of college life. When classes are done for the day, you and your friends from around the world can experience the splendor of Chicago in summertime.

Pathways Program
Learn what makes UChicago one of the most innovative universities in the world with the Pathways Program, a three-week program where students can choose from a wide array of subjects, each featuring guest lectures by faculty members from across the university who specialize in the field. Programs this summer will be offered in the following subjects:

- **Economics**: Topics like cutting-edge economic research and experimental economic theory are explored through lectures in UChicago’s globally ranked Griffin Department of Economics.

- **Neuroscience**: Lectures, field trips, and brain dissections introduce students to time-honored findings as well as cutting-edge research in the broad field of neuroscience.

- **Molecular Engineering**: A foundation in mathematics, physics, chemistry, and biology defines engineering’s future. Students engage with a cutting-edge, interdisciplinary curriculum through research and discussion to learn the UChicago Institute for Molecular Engineering’s innovative approach to problem solving.

- **Human Rights**: Wide-reaching discussions explore topics such as health and human rights, human rights of migrants and refugees, and human rights and policing, all central focuses of UChicago’s Pozen Family Center for Human Rights.

- **Model United Nations**: Lectures focus on hot-button issues like global security, refugee migration, environmental policy, and populism and nationalism. Develop public speaking, research, and leadership skills—qualities that keep UChicago’s Model UN team dominating the field.

- **Research in the Biological Sciences (RIBS)**: Dive into a range of molecular, microbiological, and cellular biological techniques used in research laboratories and document your work through lab notebooks and peer presentations.

- **Stones and Bones**: Go behind the scenes at the Field Museum—one of the world’s great natural history museums—as well as into the field to learn how fossils are collected, analyzed, and conserved.

- **Chicago Immersion**: Be a college student for a summer by taking undergraduate-level courses, where you’ll explore a topic of your interest through lectures, labs, and research projects.

- **Arts and Sciences in Chicago**: Cultivate critical thinking, innovative problem-solving, and effective communication skills in interdisciplinary courses inspired by UChicago’s renowned Core curriculum, which interweave key texts from the sciences, humanities, and social sciences.

- **Admissions Academy**: Students can take part in the Admissions Academy, workshops that help students gain insight into the holistic admissions process and preparing college applications.

**See Chicago Yourself!**
UChicago’s Summer Session programs attract students from all over the world. Make amazing connections this summer with peers both in class and beyond the classroom, over a cup of coffee or a picnic lunch on the main quad of UChicago’s beautiful gothic, ivy-covered campus. Then, together, take in the outdoor music festivals, Chicago river kayaking tours, and afternoons on Lake Michigan’s shores that round out summertime in Chicago.

WHAT STUDENTS ARE SAYING
“The Pathways Program was everything I was hoping for and more. I enjoyed all of the topics covered during lectures and discussion sections, as well as meeting people who were as curious and interested in learning as I am. The lectures allowed me to understand how a proper college education works, and the level at which they are taught.”
